DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 4, 2007 has been entered.
2. This Office action is in response to Applicant's amendment filed December 4, 2007. Applicant has amended claims 11, 15 and 18. Claims 12 and 23 have been cancelled. Currently, claims 11, 14-22 and 24-30 remain pending in the application.
3. The text of those sections of Title 35 U.S. Code not included in this action can be found in the prior Office actions, Paper Nos. 20070216 and 20070826.
4. The rejection of claims 11, 14, 22 and 24-30 under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hoffarth, U.S. Patent No. 5,705,476, is maintained for the reasons of record.

5. The rejection of claims 12, 15-17, 20, 21, and 23 under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hoffarth, U.S. Patent No. 5,705,476, is withdrawn in view of applicant's amendments and remarks.

6. The rejection of claims 18-19 under 35 U.S.C. 103(a) as being unpatentable over Hoffarth, U.S. Patent No. 5,705,476, in view of Clement et al, WO 01/04183, is withdrawn in view of applicant's amendments and remarks.

7. The provisional rejection of claims 11, 12 and 14-30 on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9 of copending Application No. 10/575,760 is withdrawn in view of applicant's amendments and remarks.

Response to Arguments

8. Applicant's arguments filed December 4, 2007 have been fully considered but they are not persuasive.

Applicant argues that Hoffarth, U.S. Patent No. 5,705,476, does not teach or suggest in general a composition comprising an alkoxylate compound for use in the specific methods required in newly amended claim 11. In response to applicant's argument that that Hoffarth does not teach or suggest in general a composition comprising an alkoxylate compound for use in the specific methods required in newly

amended claim 11, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In the instant case, the examiner asserts that the compositions disclosed in Hoffarth would be capable of performing the intended uses, since the compositions disclosed in Hoffarth are used in methods of cleaning and treating substrates that are analogous to those required in the instant claims.

Applicant further argues that Hoffarth, U.S. Patent No. 5,705,476, does not teach or suggest in general the specific alkoxylate of formula I, wherein a short chain propylene or butylene oxide moiety is directly connected to the alkyl radical, and a relatively long ethylene oxide moiety is connected to the propylene or butylene oxide moiety. However, the examiner respectfully disagrees. Specifically, Hoffarth clearly discloses an alkoxylate compound of formula Ic, wherein 1 mole of propylene oxide (i.e. p is 1) is connected directly to the alkyl radical, and 10 moles of ethylene oxide (i.e. q is 10) is connected to the propylene oxide moiety (see abstract and see col. 1, line 45-col. 2, line 20), as required in the instant claims. It is noted by the examiner that instant claim 11, as presently written, requires the variable A to be either propyleneoxy or buteneoxy, which is clearly taught by Hoffarth. The examiner asserts that the 1 mole of propylene oxide and 10 moles of ethylene oxide for the compound in Ic are disclosed with sufficient specificity in the Hoffarth reference. Furthermore, the examiner asserts

that Hoffarth clearly discloses that the alkyl radical (i.e. R¹) includes iso-decyl (see col. 2, lines 23-45 and col. 3, lines 1-11), as required in the instant claims.

Allowable Subject Matter

9. Claims 15-21 are allowable over the prior art of record, since the prior art of record does not teach or suggest in general a composition containing the specific alkoxylate compound required in instant claims 15-21.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian P. Mruk whose telephone number is (571) 272-1321. The examiner can normally be reached on Mon-Thurs (7:00 AM-5:30 PM).
